Welcome to our Sunday morning gathering

We hope that you will enjoy the morning, and you are invited to stay on afterwards, for refreshments, and the opportunity to meet people, and have the chance to chat, after the “formal” part of the morning is over.

Our meetings tend to be informal, and the leader will seek to make room for the spontaneous - testimony, prayer, etc., from the congregation. We are charismatic in our worship and believe in the dynamic presence of God by his Holy Spirit.

We also generally offer a full programme on a Sunday morning for children up to school year 8, along with crèche facilities for parents/carers with younger children. WorldChangers and Junior Church go out for their own time part-way through the morning, at around 11am.

If you would like prayer for anything that may be concerning you, please speak to one of the leaders, or anyone with a badge.

There is a hearing loop system in the middle of the hall.

Toilets are situated upstairs on the first floor - turn right at the top of the stairs. There is also a disabled toilet on the ground floor. Go along the main corridor and turn left.

For where two or three are gathered together
in my name, I am there among them.”

Matthew 18:20

**HEAVENS ABOVE!
ANCIENT BIBLICAL COSMOLOGY AND THE MODERN WORLD
with Dr Robin Parry
Tuesday 22nd January
8pm at Lindisfarne House**

Biblical understandings of the cosmos in which we live reflect ideas found across the ancient world. Often when we read the Bible it never even occurs to us that its authors thought about the universe differently from us and so we impose our modern views onto the ancient texts without realizing that we are doing so. However, when we do start to notice some of the differences between our modern cosmology and the Bible's ancient cosmology, the biblical ideas can seem very strange.

In this talk, Dr Robin Parry will explore ancient Israelite views about the sky: the sun, moon, and stars, the solid sky-dome above the stars, the heavenly ocean, and God's dwelling place in the invisible heavens beyond the sky-dome. He will consider the interesting and tricky question of how we can and should learn from such ancient thinking, even in an age of astrophysics.
